Dear Kris:

Please accept this letter as a follow-up to our recent telephone conversation, wherein we discussed the odor problems emitting from LPSCO.

As you know, this has been a problem since we moved in (March, 2005), where we would call SunCor and advise them and they in turn would email Matthew Garlick of LPSCO. At that time, the odor was not as toxic as it is today. After SunCor sold LPSCO to Algonquin Water it was "downhill" from then on.

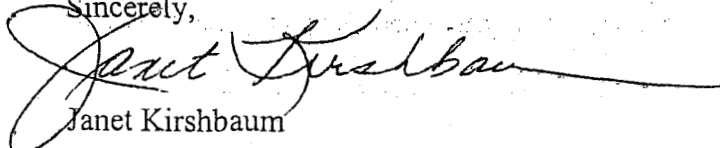

Since our meeting at LPSCO in July 6, 2006, the problem has not been eliminated. Tim at Silk Flowers, a few doors from us, circles his calendar every day it smells; however, since our meeting in July, I have notified Matthew of an odor problem nine times. Given the fact that we were out of the office three weeks during that time, it is not a good record.

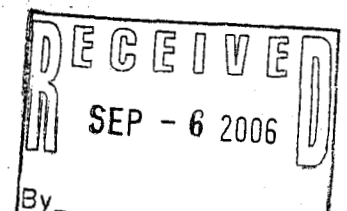

The other night we came by the office around 9:00 p.m. to pick up our car and the odor was just unbearable. The next morning our office had a stench that was certainly quite unpleasant. Also, as mentioned in our conversation, we even smelled it in Pebble Creek coming out of the Tuscany Falls Clubhouse with prospective buyers:

What is your advice to us? It is an intermittent problem, and so one only has to sit outside day in and day out to count how many times there is a problem to know the exact amounts. Our concern, certainly besides the horrid odor is also for health reasons.

Thank you for listening.

Sincerely,

Janet Kirshbaum

RE: PALM VALLEY WATER RECLAMATION FACILITY FOLLOW-UP

Dear Mr. Dodds:

The City of Goodyear is in receipt of your letter dated August 10, 2006 responding to the City's letter requesting flow rates and ongoing odor issues.

In your response, you state "The data shows that at the end of 2006 the average daily wastewater flows will be 3.0 mgd, which is 71% of the design capacity of 4.2 mgd.

While your letter has addressed the request for a schedule of anticipated sanitary sewer flows into the Palm Valley Water Reclamation Facility (PVWRF) over the next thirty-six (36) months, it did not address our further request, specifically "...as well as a time frame for full plant capacity." To clarify, the City is requesting a time frame, or anticipated date, for full plant capacity at the PVWRF.

I look forward to your reply and if you have questions or comments, please contact me directly at 623-882-7512.

Sincerely,

CITY OF GOODYEAR

Shawn Bradford
Water Resources Director
